HESE Greek characters form the two words or roots from which comes our English word "ENCYCLOPŒDIA," which, according to the Century Dictionary and Cyclopædia and Atlas, means "a system of instruction in several or ALL DEPARTMENTS OF KNOWLEDGE," and again "The Round of Learning."

The Century Dictionary and Cyclopedia and Atlas are essentially the ten best books for teachers, as they are for students, school-children or college professors. They embrace the sum of the world's knowledge from the beginning down to to-day.

The wealth of facts is presented so concisely as to entirely do away with the cumbersome features of most other works of the sort—so clearly as to be readily understood by a child so completely that omissions are the only things the work doesn't contain, and in such order as to be instantly findable (one doesn't have to learn how to find things in the "Century").

It's as easy now to own a set, as to use it—only \$1 down (membership fee in the new Wanamaker Century Dictionary Club) and \$3 monthly for 14 months—or more, depending on the binding you choose.

> Specimen pages, sample maps, illustrations, etc., will be mailed on request-or you can examine the books themselves at the store.

Every College in this country possesses a set.
